## Faces of Oconee

**Meet Anna Leigh Hardigree!** Anna Leigh joined the county in May 2024 as an IT Support Technician. She also previously served the county as a Parks Assistant, and has diverse experience in the world of tech. Anna Leigh is finishing up her Associate's Degree in Computer Programming and is also focusing on achieving several certifications by the end of the year.

Anna Leigh grew up in Bishop/Watkinsville and currently lives in Athens. Her mother, Cindy Hardigree, had a long career at the county, and Anna Leigh felt Oconee County would be a natural fit for her. Anna Leigh cherishes her relationship with her two older sisters and dotes on her two cats named Magni and Loki. She just celebrated a two-year anniversary with her boyfriend.

When Anna Leigh is not working, she enjoys playing video games, tinkering with computers, programming, and music, particularly going to concerts.

Her favorite thing about her job is being able to help others. "I just genuinely like helping people," says Anna Leigh. "Technology is ever changing, ever innovating, and it's overwhelming. I love being able to make someone's day even slightly better by fixing that 'one thing' that's been bothering them or blocking their day's progress. I love being asked questions about tech, so please let me put my years of nerd prestige to use."

"Anna Leigh is a bright light in this world. Wherever she goes, she radiates positivity, and, mixed with her extensive tech knowledge, she has cemented herself as a valuable member of our team."

One could even argue that she is the bomb dot com," Juan Silva, IT Specialist, says.

Justin Milligan, IT Director, comments, "Anna Leigh's hard work and positivity have been a great asset to our IT team."

Thank you, Anna Leigh, for all you do for Oconee County!

# Website Redesign Launch

## Updates Are Coming to OconeeCounty.com

On Thursday, September 12, the county website will get a new look! The Website Redesign Team has been working with CivicPlus to launch a redesign focused on intuitive navigation and a mobile first environment to bring a better user experience to our website visitors.

As the update is implemented on the morning of September 12, we ask that you refrain from making changes to the website between **9 a.m. and 1 p.m.** This will help ensure that the designers can work as efficiently as possible.

Please email [oconeeconnects@oconee.ga.us](mailto:oconeeconnects@oconee.ga.us) with any questions.

**Important to note: All the content will stay the same, as we get a new, fresh look.**

As a reminder, drop in website training is held every second Thursday from 10 a.m. to 11:30 in the Communications Conference Room.

## Preparations for Launch

- Archive/delete old documents from your department page and document center.
- Make current documents ADA compliant (Contact Tristen Thomas with any ADA questions at [tthomas@oconee.ga.us](mailto:tthomas@oconee.ga.us))

## Checklist For a Strong Password

!m#P52s@ap\$V43

- Uppercase and lowercase
- At least 12 characters
- Symbols (!, @, #)
- Non-sequenced numbers
- No dictionary words
- No personal data like a birthday

## From the IT Workroom

### The Importance of Strong Passwords in Cybersecurity:

Cybersecurity threats are always evolving, and a strong, unique password is your first line of defense. Test your passwords below by seeing if they align with these general guidelines:

#### 1. Complexity is Key

Use a mix of uppercase and lowercase letters, numbers, and special characters (like !, @, #). Though it may seem obvious, a good password should never be simple.

#### 2. Length Matters

Aim for at least 12 characters. Consider using passphrases—strings of random words or sentences—that are complex. This can be tricky to discern a strong passphrase from a weak one. As an example: “ilovecats24” would not be a good passphrase. “!nthrOughth30utd00r108670” is a great passphrase.

#### 3. Avoid Common Pitfalls

Steer clear of easily guessable information (like birthdays or names) and avoid predictable patterns (like “123456”). A criminal can be familiar with your personal information, like pet names or favorite music groups.

#### 4. Update Passwords Regularly

It's good practice to change your passwords every 90 days to stay ahead of potential breaches. Frequent changes can thwart attackers who may have acquired your login credentials.

#### 5. Use Multi-Factor Authentication (MFA)

Enable MFA where possible. It adds an extra security layer by requiring a second form of verification, like a code sent to your phone. You may already be utilizing or at least familiar with some MFA applications, like Microsoft Authenticator. These applications act as another layer of defense against someone logging in to a site/application with your credentials.

#### 6. Watch Out for Phishing

Always double-check URLs, and ensure you're on an official login page before entering your password. This is one of the most common ways organizations are compromised. Criminals can 'copy' a legitimate site's appearance to look official, but in truth, they're hoping you enter sensitive information to their malicious site without checking the URL.

#### 7. Education and Training is Vital

Cyber threats are always changing with time. Keep up with the latest cybersecurity news and best practices to stay safe, including at home.

As always, please feel welcome to reach out to the IT Department with any questions, concerns, or recommendations for fostering a stronger defense against Cybercrime!

Stay Safe,  
IT Department

## Around the County

### **KOCBC at the Senior Center**

Keep Oconee County Beautiful Executive Director Cindy Pritchard hosts quarterly seminars at the Oconee County Senior Center focusing on a variety of topics related to litter, recycling, and beautification. During the August session, Pritchard introduced a special program for Senior Center participants that assists them with hard to recycle items, keeping these items out of landfills. For more information about Keep Oconee County Beautiful, visit [www.oconeecounty.com/kocbc](http://www.oconeecounty.com/kocbc).

### **MACORTS 2050 MTP**

MACORTS has prepared the DRAFT 2050 Metropolitan Transportation. All project information is available through the project webpage, where you can review draft documents and provide comments through September 13, 2024. The planning process will extend through the Fall, with final adoption anticipated by October 7, 2024. To learn more about the MACORTS 2050 MTP update, visit online at: <https://www.macorts.org/2050-mtp-update.html>

### **Communications goes to UGA**

We look forward to working with our GradyNewsSource student journalists every semester! Their commitment to reporting on important issues in government is inspiring, and we are happy to welcome several student journalists, Sarah Sims, Ethan Wright, and Julianna Russ, to the Oconee County beat! Thank you to the Grady College of Journalism and Mass Communication, University of Georgia for this opportunity to help guide our next generation of government reporters!

**Congratulations to everyone on our team celebrating another year of service to the residents of Oconee County! Thank you for making our organization an outstanding place to work and for your dedication to our community! We appreciate all that you do!**
