Protect Our Water

Storm Water Management

Program Overview
Oconee County's Storm Water Management Program was created in 2004 to comply with Phase II of the National Pollutant Discharge Elimination System, part of the Federal Clean Water Act, that requires local governmental agencies to obtain a permit and monitor the storm water runoff in their jurisdictions.

Purpose
The purpose of the program is to reduce water pollution caused by storm water runoff. Stopping pollution at its source is the most effective way to prevent harmful pollutants from being washed by storm water runoff into our storm drains, and ultimately, our rivers and creeks. Our program consists of six elements:

- Public Education and Outreach
- Public Participation
- Illicit Discharge Detection and Elimination
- Construction Site Runoff Control
- Post-Construction Runoff Control
- Pollution Prevention and Good Housekeeping
