

Post-Construction Storm Water Management in New Development and Redevelopment

Legal Authority

Ordinance currently in place: Article 11 of the Unified Development Code of Oconee County (UDC) incorporates the storm water management ordinance. The GSMM is adopted by reference in Section 1102.01 & the language automatically applies any amendments and/or updates so that the latest version is applicable.

Results of evaluation: The existing ordinance does grant legal authority to adequately address post-construction runoff from new development or redevelopment projects in order to minimize water quality impacts and attempt to maintain pre-development conditions.

Ordinance modifications: None needed at this time.
