Phone Number: _____
Project Manager: _____
Project Number: _____

Allowable Bearing Pressure: _____ psf
(Includes any interior footings such as piers and slab footers)

Personnel from our firm have verified the bearing capacity of soils intended to support the residence noted above. Where appropriate, we have monitored proof rolling of residual soil prior to fill placement, conducted laboratory Proctor and field density tests on fill soil, and/or conducted dynamic cone penetrometer tests on sub-grade soils. This work was performed in accordance with accepted engineering practice in accordance with Section R402.1 of the current edition of the International Residential Code as adopted by the State of Georgia.
